

If you choose to use marijuana,
KNOW YOUR PRODUCT!

Not all marijuana is created equal. You should ask:
Where is the product from? What is the THC level?
Are other substances mixed in?

Intensity levels vary depending on how the product is consumed: dab/wax form is nearly 90% THC versus smoking marijuana which is typically less than 20% THC.

Do not mix marijuana with alcohol.

Remember, **using marijuana recreationally is illegal** in St. Louis and on WashU's campus.

People can react differently to the same substance. If something goes wrong, do not hesitate to **call 911 or EST in an emergency.**
